grip

The Challenge

AI is moving faster than most companies can manage.

New tools and models appear every day, often without oversight. Teams want to move fast, but security teams need to stay in control.

The Solution

Grip gives you complete visibility into every AI tool, agent, and model, showing what's safe, what's risky, and how to fix it.

Stay secure without slowing innovation:
- Discover AI across your business
- Identify and govern risks
- Act fast to protect your organization

Grip Secures AI Wherever It's Used

Shadow AI
AI tools used without approval or tracking

Embedded Models
Hidden AI features built into apps and services

AI Agents
Smart systems that act or interact on their own
